dantranux@gmail.com | <https://www.linkedin.com/in/dantranux/>

I am looking for full stack developer or UX designer roles. 2+ years of experience in UX/UI design. 1+ year in web development. 3+ years in video editing. In-depth knowledge of the design process. Emphasize users first in the design. Intermediate at multitasking and management of small teams (3-5 people). Intermediate in analysis (user testing and machine learning). Intermediate in design and programming.

EDUCATION

Full Stack Web + Mobile Development Bootcamp Oct 2021 – Mar 2022
Nucamp (Online)

Bachelor of Science (B.S.) - Human Computer Interaction Sep 2016 - Dec 2020
University of California, San Diego, San Diego, CA

CERTIFICATES

UX Academy Foundations Aug 2021 – Oct 2021
DesignLab

Relevant Experience

Design Consultant Oct 2021 – Nov 2021
Barlive

- Working with CEO & CTO to create product from scratch
- Consulted with CTO to decide features on mobile app & desktop version
- Designed Figma prototypes for mobile app & desktop

Projects

Full Stack Developer Aug 2021 - Present
Stratlog (Personal Project)

- An ongoing personal project. A web application that helps CS:GO players and teams store their strategies in one place
- Made with MERN Stack (MongoDB, Express, React, NodeJS)
- Uses CRUD and MVC functionality

UX Researcher Nov 2020 - Dec 2020
Component Redesign - Pinterest (School Project)

- A one-month school project (4 people) - redesigning Pinterest's search component based on analyzing user experience
- Tested user experience of the mobile website and analyzed the results of a small sample size to effectively decide what to redesign
- Analyzed competitors' use of the search component
- Sketched and created prototypes of a redesign of the search component with paper sketching and Figma
- Analyzed results of the redesigned component over the original component

UX Designer & Full Stack Developer

Jan 2019 - Mar 2019

Temporal (School Project)

- A two-month school project (3 people). Made a mobile web app that helps facilitates task management.
- Made from scratch with the design process in a 10-week period with two other people. Used Figma and NodeJS
- Iteratively revised the application based on feedback on all stages
- Collaborated with team to meet deadlines for the project
